

## My Mission Statement

I will become a kind, confident and successful person, who treats everyone in an energetic, genuine and friendly way.

I will be honest, understanding and friendly to my family and out-going, dependable and considerate with my friends.

I will foster perseverance, self-discipline and focus as part of my character in my pursuit of becoming a successful programmer

I will treat my body with respect by regularly eating healthy, playing basketball and cycling so that I have the health and energy to support the rest of my goals.

I will spend time becoming an excellent artist, singer and photographer because I enjoy doing these things and I only have one life to live.
